

With the construction of light rail on Cedar, the city will effectively be split into two major areas: **east of Cedar, the Lower Town Area**, and **west of Cedar, the Rice Park Area**, as many east/west travel routes will be affected by construction. See map for the light rail construction route in Black. So having a strategy for getting into and out of downtown will be important depending on destination.

Here are some tips that may help with your travel:

From the West to the Rice Park Area

Option A: Take 94 east to the 5th Street exit. Continue past 7th Street to parking facilities located in downtown.

Option B: Take 94 east to the 10th Street exit. Right on St Peter Street to parking facilities located in downtown.

Option C: Take 94 east to the Marion/Kellogg Blvd. exit. Continue on Kellogg to parking facilities located in downtown.
